

Appendix I

Countries and territories that are identified by relevant external sources as presenting a higher risk of **ML**, **TF** and/or **FTPF**

Appendix I lists countries and territories that are identified by the UK, US governments, intergovernmental and supranational organisations as presenting certain **ML**, **TF** and/or **FTPF** risks. -Alongside these sources, information is presented reflecting assessments of a country or territory by non-governmental organisations and think tanks which firms may also find useful when they are determining the level of country risk presented by a *business relationship* or *occasional transaction*. *The Commission* does not accept responsibility for the findings and conclusions of these sources. The inclusion of a country or territory in Appendix I does not automatically imply that a *business relationship* or *occasional transaction* with a *relevant connection* to a country or territory on Appendix I is high risk, as the firm can continue to take a risk based decision on the level of overall risk within a *business relationship* or *occasional transaction* as set out in Section 3.4 of this *Handbook*. Please note that those countries and territories in relation to which the FATF has called for the application of countermeasures and therefore the firm must apply *ECDD* measures to a *business relationship* or *occasional transaction* where the *customer* or *beneficial owner* has a *relevant connection* with one of those countries or territories are listed in Appendix H.

Country/territory	Intergovernmental and Supranational Organisations, UK and US Government Sources							Non-Governmental Organisations and Think Tanks
